

April 2009 Comex Gold **February 6, 2008**
as of pit session close 12:30 PM CST 12 hour chart

next resistance zone

**Not much to say about today -
 Talk of an expected stimulus bill
 (a pork bill) coming out of Washington
 ran the equity markets higher and the
 Dollar lower as risk came back into vogue.**

**Gold now being seen as unnecessary by
 some if the economy is on the verge of
 hitting bottom.**

**Wait until next week when everything changes
 once again. For now gold continues to
 stay in the upper levels of its trading channel**

Gold ETF reports another record in its holdings.

**Many commodities seeing money flowing in today.
 Platinum over \$1000 and copper up very big on the
 view that China's economy will recover soon.**
